## 1 Maintenance schedule

Perform this maintenance procedure **annually** to ensure the two heater reflector screws (north end and south end) are tight. This schedule recommends the minimum frequencies. Always follow hospital and local regulations.

**WARNING:-**

Failure to perform this maintenance per recommended frequency can result in patient harm or injury.

**Addendum - Preventive maintenance procedure for Heater Reflector screws**Page **11** of **15****2 Introduction**

The main purpose of this document is to explain step by step preventive maintenance procedure for tightening the Heater Parabolic Reflector screws.

**Resource needed:**

- 1 Field Engineer /Bio med

**Tools needed:**

- One long Philips screw driver
- One M3 wrench or nut driver
- One small step stool
- Allen key Size 3 mm
- Allen key size 4mm, 1-Qty

**Equipment needed**

- No special equipment needed

In either case service personnel shall pay attention to below warnings.

	<b>WARNING:-</b> Before replacing parts always do the following: 1. Switch off the power. 2. Set the castor brakes. 3. Remove the cylinders if they are mounted on to the Lullaby Warmer. 4. Always use anti-static material and wear anti-static wrist strap, safety glasses, safety shoes and safety gloves while dismantling the Lullaby Warmer to avoid possible damage due to static electricity and sharp edges.
	<b>WARNING: -</b> Ensure power is OFF, before removing any covers for replacement of parts.
	<b>WARNING:-</b> The heater assembly and the protective grid may still be hot if you dismantle the unit immediately after it has been in use.
	<b>CAUTION:</b> Do not touch the inside of the heater reflector. Imprints of fingers may reduce the output of the heater's reflective surface. The temperature of the heater can be determined by holding the skin temperature probe against the heater.

### 3 Heater Reflector Screws Preventive Maintenance Check Procedure
